## Horizontal, Multi-Stage Stainless Steel Pumps

### FEATURES

The horizontal multistage pump XHC has been created with compactness and modularity as two of its central features, making numerous configurations possible. The pump is basically composed of a series of interchangeable seamlessly, no matter what the application.

The XHC pumps are available in AISI304 (DIN 1.4301) Stainless Steel which is for water and non-corrosive liquids and AISI316 (DIN 1.4401) stainless steel which offers a high degree of corrosion protection against aggressive liquids.

- Compact design
- Pump and motor are integrated in a compact and user-friendly design.
- The pump is fitted to a low-profile base plate, making it ideal for installation in systems where compactness is important.
- High Efficiency
- Modular construction/customized solutions: The modular construction of the XHC pumps make it easy to create many different variants based on standard factory parts. This means that it is possible to create pump variants that are customized for the application in question.
- Worldwide usage
- With different voltage and frequency combinations, XHC product ranges cover markets worldwide.
- High reliability
- Wide performance range
- Low noise level
- High performance hydraulics
- Horizontal construction, a threaded inlet and outlet for standard installation.
- Wet end of pump are made in stainless steel AISI304 or AISI316
- Thermal protection for single phase motor
- Maximum liquid temperature 110°C
- Installation class: F, IP55 protection
- Shaft seal is mechanical seal, different friction couples will be selected for different medium.
- Mechanical Seal: SIC/SIC-EPDM

### APPLICATION

The XHC pumps are designed to cover a wide variety of applications, ranging from small domestic installations to large industrial systems. The pumps are therefore suitable for a wide diversity of pumping systems where the performance and material of the pump must meet specific demands.

#### WASHING & CLEANING

- Degreasing and washing of production equipment in industrial environments such as the food and beverage industry.
- Washing machines
- Vehicle washing tunnels
- Mobile washing units
- Units for CIP (Cleaning In Place)

#### WATER TREATMENT

- Nano, micro and ultra-filtration systems
- Softening, ionizing, demineralizing systems
- Desalination systems
- Distillation systems
- Separators
- Swimming baths

#### TEMPERATURE CONTROL

- Electronic data processing
- Laser equipment
- Medical equipment
- Industrial refrigeration
- Heating and cooling in industrial processes
- Moisturizing and humidifying

#### PRESSURE BOOSTERING

- Pressure boosting and transfer of drinking water
- Process water systems

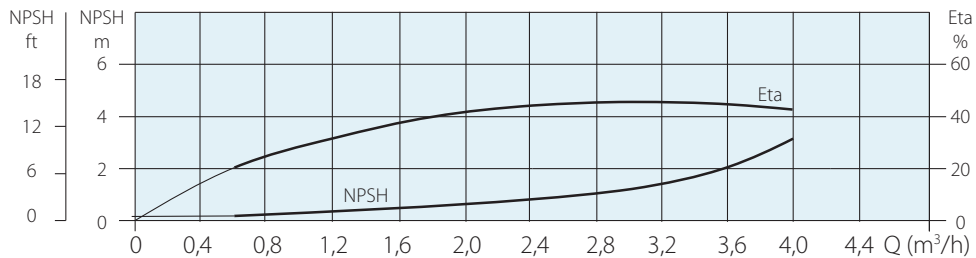

#### OTHER APPLICATIONS

- Distilling systems
- Dosing and mixing
- Evaporation
- Comprised machinery
- Chemical industry
- Pharmaceutical industry
